

CONFERENCE SESSIONS

Please note: This is not a complete list of the conference sessions.

OSHA OUTREACH 10-Hour Safety Course for General Industry in English only

This course covers the OSHA policies, procedures and standards, as well as general industry safety and health principles. Topics include scope and application of the OSHA general industry standards. Special emphasis is placed on those areas that are the most hazardous, using OSHA standards as a guide. Upon successful course completion, the student will receive an OSHA general industry safety and health 10-hour course completion card.

OSHA OUTREACH 10-Hour Safety Course for Construction in English and Spanish

This course covers OSHA policies, procedures and standards, as well as construction safety and health principles. Topics include scope and application of the OSHA construction standards. Special emphasis is placed on those areas that are the most hazardous, using OSHA standards as a guide. Upon successful course completion, the student will receive an OSHA construction safety and health 10-hour course completion card.

Note: Two sessions will be offered: One in English and one in Spanish

Motivating People to Safety

This presentation reviews historical methods of motivation. There are basic principles which may or may not motivate a person. The theory is then applied to an employee survey to demonstrate these principles.

Recordability vs. Compensability: OSHA and Worker's Compensation in Virginia.

Have you had questions concerning reporting of injuries and illnesses? Take some of the guesswork out of this required process. See how Workers' Compensation reporting stacks up against OSHA 300 log entries. This presentation will give you real world examples and answers to common questions.

Ergonomics in Office Settings

This presentation will provide participants with an introduction to ergonomics issues that contribute to musculoskeletal disorders (MSDs) in the office environment and emphasizes practical solutions for their control. The workshop is intended for individuals responsible for conducting office ergonomic assessments; making workstation adjustments (to input devices, monitor, chair, etc); and selecting optimal office furniture/equipment.

Fun and Games with Safety Training and Incentives

Get the latest on games and competitions guaranteed to keep your safety and health training and employee incentives in first place. You will see and experience the energy of these adaptive tools. Learn how to use tools that have been successfully developed at other work sites.

Understanding NFPA 600: Standard on Industrial Fire Brigades

NFPA 600 applies to any organized, private, industrial group of employees having fire fighting response duties, such as emergency brigades, emergency response teams, fire teams, and plant emergency organizations. This program will explain NFPA 600, including the minimum requirements for organizing, operating, training, and equipping industrial fire brigades. In addition, the safety and health requirements for brigade activities as required by NFPA 600 will be explained.

Voluntary Protection Program (VPP) Update

Find out the latest national and state information on the requirements and benefits of this prestigious safety recognition program. See if your site measures up to becoming a VPP STAR site.

Fatality Prevention Process

When you think about your company's values, there is no higher value than human life. This session will review and discuss the nature and causes of fatalities in the workplace. In this session, key aspects of the complex relationship between the work environment, work methods, culture, and leadership and the impact each of these has on the safety and health management systems as it relates to the potential for fatal consequences will be examined.

The objectives of the session are:

- Identify contributing causes and organizational weaknesses that increase the risk of fatalities;
- Dispute some current thinking on fatality prevention;
- Review NIOSH fatality investigation data; and
- Identify solutions for preventing fatalities.

Miss Utility - Safe Digging Around Utility Lines

What do you need to know to protect your employees' safety and your company's liability when digging around utility lines is necessary? This course addresses utility safety concerns.
